

Announcement

Availability of Microsoft Forefront TMG 2010 on SecureGUARD Appliance Series

As announced by the Microsoft Server & Cloud Blog, Microsoft Forefront TMG 2010 will be discontinued and will be no longer available for purchase as of Dec. 1, 2012.

Nevertheless SecureGUARD Appliances with TMG 2010 licenses will be available for purchase significantly longer than Dec. 1, 2012.

To archive the functionalities based on the also discontinued Microsoft Forefront Web Protection Suite, SecureGUARD recommends the SecureGUARD Content Security Solution for TMG, based on IKARUS security.proxy.

SecureGUARD will publish a discontinuing statement for Microsoft Forefront TMG 2010 based Appliances and the Content Security Solution at least 12 months before the end of availability.
